## Large screen support

The worksheet supports up to 25 cells at a time, ideal for those with a large monitor, and the need for seeing a lot of information at once.

To select the number of cells, click on the worksheet title and select the desired number of charts from the dimensions list (see the picture).

The worksheet also supports Portrait mode, which lets you view the worksheet in the same way as printed pages look (works with or without a portrait mode enabled monitor).
